# **API REPORTING CYCLES**

An API reporting cycle consists of two components: (1) base year information and (2) growth information. The base year reports are provided each January, and the growth reports are provided each September. The State Board of Education determined in July 2000 that the 2000 API Base should use the same methodology and indicators as that used for the 1999 API Base. Rules for including students in the 2000 API Base are expected to be revised by pending legislation (Senate Bill 1552).

## 2000 to 2001 Growth

## 2000 API Base

Schoolwide/Subgroup APIs Statewide Rank Similar Schools Rank STAR Indicators

• Stanford 9

## 2001 API Growth
